

Deumavan PROTECTIVE OINTMENT

RELIEVES BURNING SENSATIONS, ITCHINESS AND SORENESS:

- For dry, chapped genital skin, especially during and after the menopause or for cases of diabetes mellitus
- Can accompany treatment for lichen sclerosus and vulvodynia
- After the removal of genital warts, perineal tear/episiotomy or circumcision
- For chronic inflammatory skin diseases such as psoriasis or neurodermatitis

SUPPORTS THE NATURAL SKIN BARRIER TO PROTECT AGAINST:

- Urine and faeces, especially in the event of urinary or faecal incontinence,
- Mechanical strains caused by sexual intercourse, wearing incontinence materials or during sport (e.g. cycling) and
- Pathogens that can cause infections of the urinary tract and/or genital area

USE FOR HIM & HER

Frequency and duration of use of the genital ointment as required. Deumavan Protective Ointment can be applied as local, external protection in the entire external genital area: outer female and male genitals, perineum and anal area. It is recommended to apply Deumavan Protective Ointment several times a day, including preventatively.

- As preventative and long-lasting protection before and after mechanical strain
- After washing
- Before and after defecation and urination
- Before and after sporting activity
- Before and after sexual contact
- As accompanying support if changes in the skin occur

Deumavan Protective Ointment Neutral and Lavender. Medical device for daily, local external protection of the entire genital area (external female and male genitals, perineum and anal area). To relieve symptoms such as itchiness, burning sensations, redness, swelling, dryness and soreness. To prevent lesions and irritation during sexual contact and other mechanical strains. Do not use latex condoms (use polyurethane or AT-10 instead). Not to be used on the breast area by breastfeeding mothers. Please comply with the instructions for use. **Kaymogyn GmbH, Dietzgenstraße 79, 13156 Berlin**

Medical skin protection for
the genital area

According to Prof. Dr. Eiko E. Petersen

BURNING SENSATION, ITCHING, SORENESS?

NOW DEUMAVAN PROTECTIVE OINTMENT WILL HELP.

BEST TOLERABILITY THANKS TO THE ULTRAPURE FORMULATION.

When the skin in the genital area is affected by a burning sensation or is itchy or sore it can be very painful because the skin is signalling an urgent need for action. It is thinner there than in other parts of the body and as an erogenous zone is particularly sensitive with good blood circulation. It also has an important protective function. However, if the upper layer of the skin loses fat, this protection will be impaired. The missing fat will cause the skin to lose moisture and elasticity, it will become dry and chapped – and will open the way for bacterial and fungal infections as well as inflammation.

CAUSES OF DRY, DAMAGED GENITAL SKIN:

- Changes to the hormonal balance (e.g. during the menopause or during and after pregnancy)
- Excessive washing
- No or incorrect genital/anal care
- Radiation treatment
- Mechanical strains, e.g. caused by sport
- Skin diseases such as lichen sclerosus, vulvodynia
- Autoimmune diseases such as psoriasis, neurodermatitis

Its fine protective film will make the skin in the outer genital and anal area smooth and silky – which is what makes Deumavan Protective Ointment so gentle.

Relieves burning sensations, itchiness and soreness if the genital skin is dry and damaged

Hormone-free, no alcohol, no emulsifiers

Supports the natural skin barrier

No burning sensation when applied

Certified medical device

Clinically-tested effectiveness

Pharmaceutical quality made in Germany

The water-free Deumavan Protective Ointment only contains fats and oils in ultrapure pharmaceutical quality, which has proven itself in dermatology for more than 100 years.

- NO EMULSIFIERS
- NO PRESERVATIVES (E.G. PARABENS)
- NO ALCOHOL
- NO COLOURINGS
- NO HORMONES
- WITH VITAMIN E
- VEGAN

Deumavan Protective Ointment Neutral is also absolutely fragrance-free – it is hypoallergenic.

This means it can also be used on highly-sensitive skin at risk of allergies in the anogenital area and **it is officially recommended by the German Skin and Allergy Assistance Association.**

TIP

DEUMAVAN WASHING LOTION

MOISTURISING AND SOAP-FREE CLEANSING FOR DAILY HYGIENE IN THE OUTER GENITAL AND ANAL AREA

- Conserving the acid protective layer – pH value approx. 4.5
- Can be used as a genital shaving lotion
- Also for damaged genital skin
- Dermatologically tested
