

Deumavan PROTECTIVE OINTMENT

ALLEVIATES BURNING, ITCHING AND IRRITATION:

- In dry, cracked intimate skin, particularly during and after menopause and in people with diabetes
- Can be used as an accompanying treatment in patients with lichen sclerosus and vulvodinia
- In the anal area, particularly in patients with diarrhea, fissures and hemorrhoids
- In patients with chronic inflammatory skin diseases such as psoriasis and neurodermatitis

HELPS THE NATURAL SKIN BARRIER TO PROTECT AGAINST:

- Urine and feces, particularly in patients with urinary or fecal incontinence
- Mechanical stress caused by sexual intercourse, the wearing of incontinence materials or physical activity (e.g. cycling)
- Pathogens that can cause urinary tract infections and/or infections of the intimate area

FOR HIM AND FOR HER:

The frequency and duration of use of the intimate ointment depend on the individual need. Deumavan Protective Ointment can be applied as local, external protection over the entire external intimate area: external female and male genitalia, perineum and anal area. It is recommended to apply Deumavan Protective Ointment several times a day, including as a preventative measure.

- As preventative and long-lasting protection against and treatment after mechanical stress
- After washing
- Before and after passing stools and urinating
- Before and after physical activity
- Before and after sexual contact
- As additional support in the event of any skin changes

Available in your pharmacy

Deumavan Protective Ointment Neutral and Lavender. Medical device for daily local, external protection of the entire intimate area (external female and male genitalia, perineum and anal area). To alleviate symptoms such as itching, burning, reddening, swelling, dryness and irritation. To prevent lesions and irritation during sexual contact and other mechanical stresses. Do not use latex condoms (use polyurethane or AT-10 condoms instead). Breastfeeding mothers should not use the ointment in the breast area. Please follow the instructions for use. **Kaymogyn GmbH, Dietzgenstraße 79, 13156 Berlin**

Medical skin protection
for the intimate area

According to Prof. Dr. Eiko E. Petersen

BURNING, ITCHING, IRRITATION?

NOW Deumavan PROTECTIVE OINTMENT IS HERE TO HELP.

If the skin in the intimate area is burning, itching, or irritated, it can be very painful. The skin is signaling an urgent call for action. The skin here is thinner than in other areas of the body, particularly sensitive and well supplied with blood. At the same time, it performs important protective functions. However, if the top layer of skin loses fat, protection is compromised. The reduced fat layer means the skin loses moisture and elasticity and becomes dry and cracked, providing an entry point for bacteria and fungi as well as inflammatory changes.

CAUSES OF DRY, DAMAGED INTIMATE SKIN:

- Changes in hormone balance (e.g. during menopause, during and after pregnancy)
- Excessive washing
- A lack of or incorrect intimate/anal care
- Radiotherapy or diabetes
- Mechanical stress, e.g. from physical activity
- Diseases such as lichen sclerosus, vulvodynia, psoriasis, neurodermatitis

Its fine protective film makes the skin in the external intimate and anal area smooth and supple, which is what makes Deumavan Protective Ointment so ingenious.

-  It alleviates burning, itching and irritation in dry and damaged intimate skin
-  Hormone-free, does not contain alcohol or emulsifiers
-  Supports the natural skin barrier
-  No burning sensation when applied
-  A medical device with clinically tested efficacy
-  Pharmaceutical quality from Germany

*Deumavan Protective Ointment Neutral Dermatest result „Sensitive Skin“: „excellent“ 03/2025
**Deumavan Washing Lotion Dermatest result „Sensitive Skin“: „excellent“ 03/2025

VERY WELL TOLERATED THANKS TO THE HIGH- PURITY FORMULA.

Water-free Deumavan Protective Ointment contains only ultrapure fats and oils of pharmaceutical quality which have proven their worth in dermatology for more than 100 years.

- WITHOUT HORMONES
- WITHOUT ALCOHOL
- WITHOUT PRESERVATIVES (E.G. PARABENS)
- WITHOUT EMULSIFIERS
- WITHOUT COLOURINGS
- WITHOUT FRAGRANCES (PRODUCT VARIANT NEUTRAL)

Deumavan Protective Ointment Neutral has been dermatologically tested on sensitive skin and is hypoallergenic*. This means it can also be used on highly sensitive, allergy-prone skin in the anogenital region.

For added care
